

MODULAR RECONFIGURABLE EQUIPMENT STORAGE SYSTEM

Part Number: NG 142-801-001

The NEXGEN Modular, Reconfigurable Equipment Storage System (MRESS) is used by the emergency responders and the U.S. Armed Forces because it is unique and versatile. The single-side door access offers a wide range of options for storage of emergency response equipment and permits rapid and flexible deployment of the equipment during operational scenarios such as earthquake, hurricane and other natural disasters and emergencies. The MRESS has TRICON ISO container dimensions with rugged steel construction and its unique versatility makes this an ideal new option for commercial and military applications. The MRESS features four lightweight composite adjustable shelves. This unique feature significantly enhances the operational flexibility and the ability to respond in any conditions.
